

Protect Your Future

Four thousand chemicals are found in a lit cigarette *(source: www.tobacco.org)*

Ultimately tobacco use can lead to heart disease and lung cancer

Trying tobacco products for the first time can lead to an addiction

Understand that tobacco companies target teens because they make up the greatest percentage of new smokers

Responsibility starts with the individual. Take charge of *your* future

Each year more than 400,000 Americans die from a tobacco-related illness
